

Fig. 2

The diagram illustrates two cross-sectional views, labeled A and B, separated by a vertical dashed line.

- View A:** Shows a single circular lens (1) with diagonal hatching, positioned against a curved surface (2).
- View B:** Shows a more complex arrangement of components. It includes several circular elements (3, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22) and various interfaces or layers (4, 5, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22). The components are arranged in a way that suggests a multi-layered or multi-lens system.
